Section 1 Introduction and Background Information Page

1.	Introduction	1.2
1.1.	The Origin of the ECA Monitoring Blueprint	1.5
1.2.	The Structure of the ECA Monitoring Blueprint	1.6
1.3.	The Aims and Objectives of the ECA Monitoring Blueprint	1.7
1.3.1.	Aims	1.7
1.3.2.	Objectives	1.8
1.4.	Scope of the Regional Monitoring Programme	1.9
1.5.	Overview of Baseline to Year 5 Activities	1.11
1.5.1.	Scope of Repeat Surveys	1.12

Section 2 ECA Biodiversity Action Plan Page

2.	ECA Biodiversity Action Plan	2.2
2.1.	The National and International Context	2.2
2.2.	The Regional Conservation Context	2.5
2.2.1.	Regional Conservation Habitats	2.5
2.2.2.	Regional Conservation Species	2.6
2.3.	Habitats and Species within the East Channel Region	2.6
	Dredging permission Areas	
2.3.1.	Baseline Understanding	2.6
2.3.2.	Key ECR Biodiversity Habitats and Species	2.7
2.4.	Factors Affecting ECR Key Habitats and Species	2.8
2.4.1.	Natural Environmental Factors	2.8
2.4.2.	Anthropogenic Factors	2.9
2.5.	Current Management Framework	2.9
2.6.	Aims of the ECR BAP	2.10
2.7.	Objectives of the ECR BAP	2.11
2.8.	Objective, Actions and Targets	2.12
2.8.1.	Progress Update	2.16
2.9.	Monitoring, Reporting and Review of the ECR BAP	2.19
	Objectives	
2.10.	Future Initiatives	2.20

Section 3 Survey Methods – Considerations, Constraints and Techniques	Page
--	-------------

3.	Survey Methods – Considerations, Constraints and Techniques	3.2
3.1.	Spatial Considerations	3.2
3.1.1.	Hydrodynamics	3.2
3.1.2.	Sedimentary Environment	3.3
3.2.	Constraints	3.4
3.2.1.	Nature Conservation Interests	3.4
3.2.2.	Timing of Surveys	3.5
3.2.3.	Timing of Licence Consenting	3.5
3.3.	Sampling Techniques and Survey Arrays	3.6

Section 4 Regional Ecological Monitoring Programme	Page
---	-------------

4.	Ecological Monitoring	4.2
4.1.	Definitions	4.2
4.2.	Objectives, Hypotheses and Thresholds	4.3
4.2.1.	General Objectives	4.3
4.3.	Aims and Theoretical Frameworks	4.7
4.3.1.	Benthic infaunal and epifaunal communities	4.7
4.3.2.	Epibenthic communities, biotopes and habitats	4.11
4.3.3.	Commercially important epifaunal species, specifically scallop and crab	4.14
4.3.4.	Demersal fish species and associated epibenthic communities	4.15
4.3.5.	Pelagic fish species with epibenthic spawning	4.16
4.4.	Survey Methods	4.18
4.4.1.	Sampling Techniques and Survey Arrays	4.18
4.4.2.	Survey Array for Benthic Infauna and Epifauna using the Hamon Grab	4.18
4.4.3.	Epibenthic Scientific 2m Beam Trawl	4.21
4.4.4.	Epibenthic 4m Beam Trawl	4.21
4.4.5.	Scallop Dredging	4.22
4.4.6.	Acoustic Survey and Video Array	4.22
4.4.7.	Herring Spawning and Larval Assessment	4.24
4.5	Benthic Sample Analysis	4.25

Section 5 Regional Physical Monitoring Programme	Page
---	-------------

5.	Physical Monitoring Studies	5.2
5.1.	Aim	5.2
5.2.	Assumptions	5.2
5.3.	Overview of Methods	5.4
5.4.	Seabed Sediment Study	5.5
5.5.	Screening and Overspill Discharge Study	5.10
5.6.	Plume Study	5.14
5.7.	Tracer Study	5.19
5.8.	Thresholds	5.35

Section 6 Reporting and Review	Page
---------------------------------------	-------------

6.	Reporting and Review	6.2
6.1.	Overview	6.2
6.2.	East Channel Environmental Network (ECEN)	6.3
6.2.1.	Terms of Reference	6.3
6.2.2.	The Purpose of the East Channel Environmental Network	6.3
6.2.3.	Members of the ECEN	6.4
6.3.	Reporting and Review Framework	6.6
6.3.1.	Annual Dredging Activity Report	6.6
6.3.2.	Annual Screening Report	6.7
6.3.3.	Tracer Study Report	6.8
6.3.4.	Regional Plume Study Report	6.9
6.3.5.	Annual Seabed Sediments, Part 1 – Process Report	6.10
6.3.6.	Annual Seabed Sediments, Part 2 – Status and Dredging Operations Report	6.11
6.3.7.	Annual Regional Ecological Monitoring Report	6.12
6.3.8.	Annual ECA BAP Report	6.13
6.4.	ECEN Meetings	6.14
6.4.1.	Initial Start-up Meeting	6.14
6.4.2.	Annual Meetings	6.14
6.4.2.1.	ECEN Technical Working Group Meeting	6.14
6.4.2.2.	ECEN Stakeholder Group Meeting	6.14
6.5.	Annual Review Reporting	6.9
6.5.1.	Annual Monitoring Interpretation and Summary Report	6.15
6.5.2.	ECR BAP Annual Report	6.15
6.6.	Regional Environmental Assessment II	6.15
6.7.	Storage and Dissemination of Information	6.16
6.6.1.	ECA GIS	6.9
6.6.2.	ECA Website	6.10

Annexes

Annex 1 Tables

Table 1	Anticipated Effects of Dredging
Table 2	Matrix of Potential Thresholds related to Ecological Monitoring
Table 3	Hypothesis Summary Table
Table 4	Ecological Sample Numbers in the EEC
Table 5	Survey and Reporting Gantt (Baseline to Year 5)
Table 6	Annual Ecological Monitoring Survey Windows
Table 7	Baseline to Year 5 Programme of Biological Monitoring
Table 8	Baseline to Year 5 Programme of Physical Monitoring

Annex 2 Figures

Figure 1	Location of the East Channel Region
Figure 2	Sedimentary Environment
Figure 3	ECR Average PSD
Figure 4	Likely Extent of Impacts Resulting from Extraction Activity in ECR DPAs based on Tidal Excursion
Figure 5	Potential Areas of Conservation Importance
Figure 6	Baseline Benthic Grab Array (including 6a-f showing DPA PIZ arrays)
Figure 7	Epibenthic 2m Scientific Beam Trawl Array
Figure 8	Epibenthic 4m Beam Trawl and Scallop Dredge Array
Figure 9	Sidescan Sonar Survey Areas – Ecological Monitoring
Figure 10	Video Sampling Sites
Figure 11	REA Seabed Sediment Model
Figure 12	Proposed 473 East Baseline Regional Seabed Sediment Survey Array
Figure 13	Data Collation, Reporting and Review Process

Annex 3 Specifications and Operating Procedures

EMSOP	Ecological Monitoring SOP
EASOP	Ecological Analysis SOP
SSbSOP	Seabed Sediment Baseline SOP

Annex 4 Supporting Information

Annex 4.1	Statutory Nature Conservation Advice, JNCC 2004
Annex 4.2	Regional Environmental Assessment CDROM
Annex 4.3	Blueprint v0.3 CDROM
